Dr. Jane Summerson, EIS Document Manager (M/S 010)
Yucca Mountain Site Characterization Office
DOE - Office of Civilian Radioactive Waste Management
P.O. Box 30307
North Las Vegas, NV 89036-0307

Dear Dr. Summerson:

I wish to comment on the "Supplement to the Draft Environmental Impact Statement for a Geologic Repository...at Yucca Mountain.

- 1 | The shipments of highly radioactive waste are very dangerous and unnecessary. They
| should not go through Missouri and the city of St. Louis where I live. Accidents happen. |
- 2 | The waste should be stored on site, at the reactors where it was generated, to allow it to
| cool down. In the interim, perhaps a safe way to deal it can be found. |
- 3 | Yucca Mountain is not a safe way to dispose of this waste. Yucca mountain has
4 | earthquake faults, volcanic potential, and groundwater beneath it which will be
| contaminated. |
- 5 | The electric power industry should make way for truly clean ways of generating
| electricity - solar, wind, hydrogen and hydrogen fuel cells. The longer nuclear and fossil
| fuel generators are subsidized by the federal government, the longer these great new
| technologies will be delayed. |

Sincerely, ^

Jim Young
